

Dimmable LED light panels for MR rooms

These new LED light panels from IMEDCO provide a very comfortable light in your MR room. In addition to significant power saving, LED lamps have an operational life approximately ten times longer than conventional lamps.

Only 6 LED cassettes are required to provide the adequate homogenous room lighting for a room of regular size (35 m²). The dimmer allows to adapt the brightness according to your needs.

Features

- ☑ Homogenous light in your MR room
- ☑ Substantial less power consumption than conventional light bulbs
- ☑ Dimmable
- ☑ Quick and easy installation
- ☑ Less maintenance due to the longer lifetime
