

230V LED lamps for MRI rooms

These round very flat lamps from IMEDCO lend your MRI room an extremely agreeable lighting experience. 10 to 12 lamps provide bright homogenous long-life illumination for the average sized treatment room.

The system is ideal for replacing existing incandescent lamps with modern low-energy LED technology. The lamps are not dimmable, but the level of illumination can be regulated by arranging them in several independent circuits.

Features

- ☑ Homogenous illumination of MRI rooms
- ☑ Quick and easy replacement of existing 230V flush-mounted lamps
- ☑ Replacement work by IMEDCO without ramp down the MRI
- ☑ The flat design facilitates easy installation in the suspended ceiling
- ☑ Substantially less power consumption than incandescent light bulbs
- ☑ Average operating life 25'000 hours hence lower maintenance costs
- ☑ Lower heat radiation reduces air conditioning costs
- ☑ CE and Rohs certified
- ☑ 2 years warranty
- ☑ IMEDCO works quality management certified according to ISO 9001:2008
