

# LED Spot light 230VAC for MR rooms

This IMEDCO LED lighting 230VAC has been especially tested for MR rooms. In addition to significant power saving, this LED lamp has an operational life approximately twenty times longer than conventional lamps, however it is not dimmable.

If the below showed spot lamp is already installed, you can just replace the existing bulb by this LED bulb, including adapter.

## Features

- Power consumption five times less than standard light bulbs
- Warm white for easy injections on the patient (4000K)
- Less maintenance due to the longer life of LED's
- Rated bulb life approx. 25'000 hours
- Photo-biological safety certificate according to EN 62471:2006
- Low operating temperature means less influence on ambient temperature
- Tested in MRI suites
